

How well do you know your compressed air system?

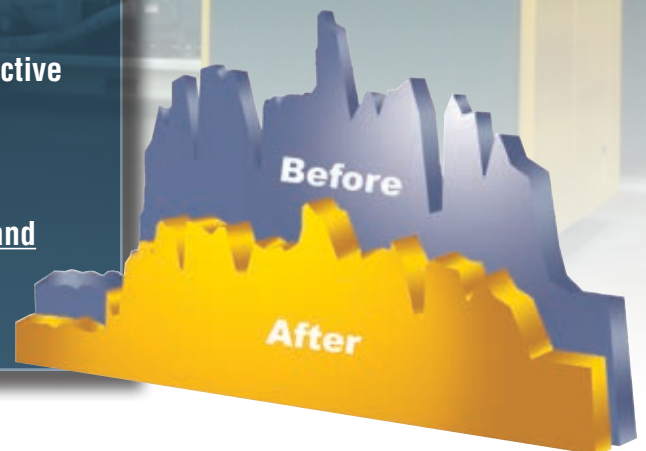

Bill, a maintenance manager of a logistics center, needed to double his facility's output and assumed he needed to buy more air compressors.

He called Kaeser for pricing on a new system. After a few questions we determined a new compressor might not be necessary.

After a no-hassle Air Demand Analysis (ADA) we showed him the following:

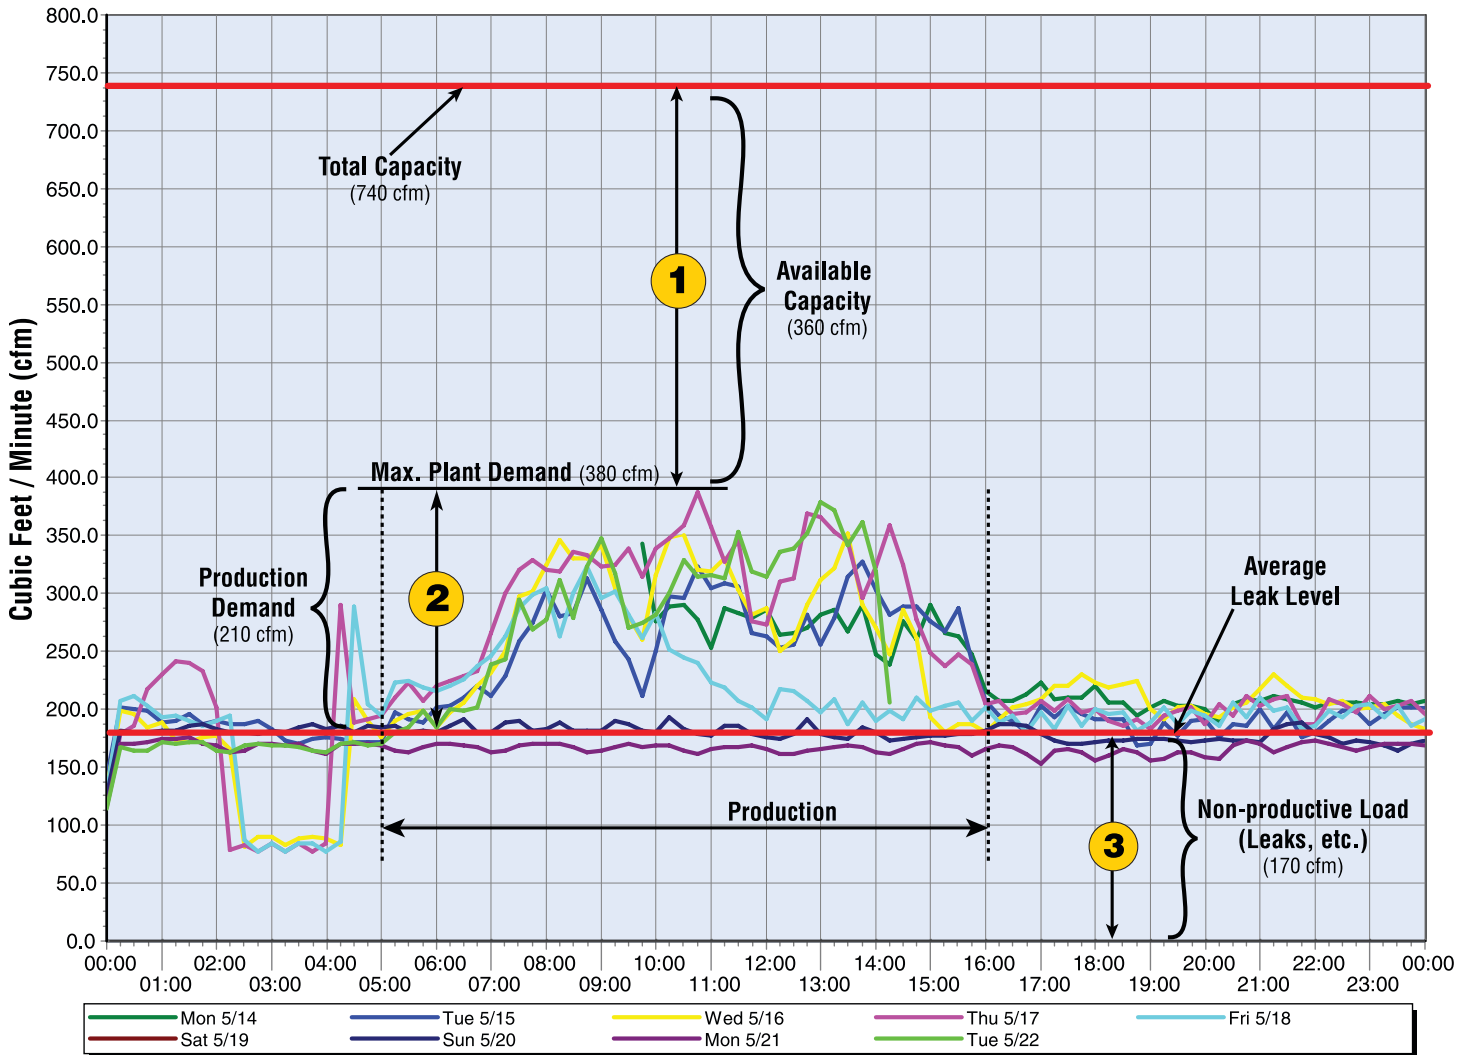

- 1** He was using only half the total air available from his existing system
- 2** His peak production demand was under 30% of his available capacity
- 3** Leaks, artificial demand, and other non-productive factors were responsible for most of his air consumption

We saved Bill the cost of purchasing new compressors and lowered his energy consumption.

What can we show you?

Air Demand Analysis

This is actual data from a 100,000 square foot distribution center.

KAESER COMPRESSORS®
Built for a lifetime.
